RE: United Heckathorn - channel traffic for the week of august 31	08/06/2009 09:39 AM

Item Body

Sharon,

I have spoken with Bill Cooke of Manson and he said that they may have to move one barge during that time period, however, he will attempt to do as little as possible. We will also attempt to not have a ship on "B" berth at that time. We have a little trouble trying to schedule things three to four weeks out.

Jim

Subject: United Heckathorn - channel traffic for the week of august 31

Hi, Jim,

We plan to conduct water column sampling and deploying the sampling equipment the week of August 31 (most likely 9/1 and 9/2). I want to be sure there is no ship or barge traffic that would adversely impact our work. This includes Manson's activities in the channel. Please contact me as soon as possible since we need to firm up our sampling schedule by August 6. Several folks will be traveling from the east coast to perform this work. We also need to have our equipment ready.

Thanks.
